Summary: Regarding the above, I explained to Mr. Stenson that their request to increase certain possession limits, i.e. Am-241 and Ra-226 would require the submission of a Decommissioning funding plan. In addition, I explained to him that although NORM (ra-226) is not currently regulated by NRC, it will be when the Final Rule expanding the definition of byproduct material to include NARM becomes effective, this is expected to occur sometime later this year. I pointed out to him that his calculations on the attached Table 2, Column 4 to their letter are in error. Specifically, the 10 ^5 values for Am-241 and Ra-226 should be 1000 uCi, not 10,000 uCi. He stated that the RSC would be meeting shortly to discuss these issues and he would be sending a revised request.
